# THE EXCELLENCE LOOP
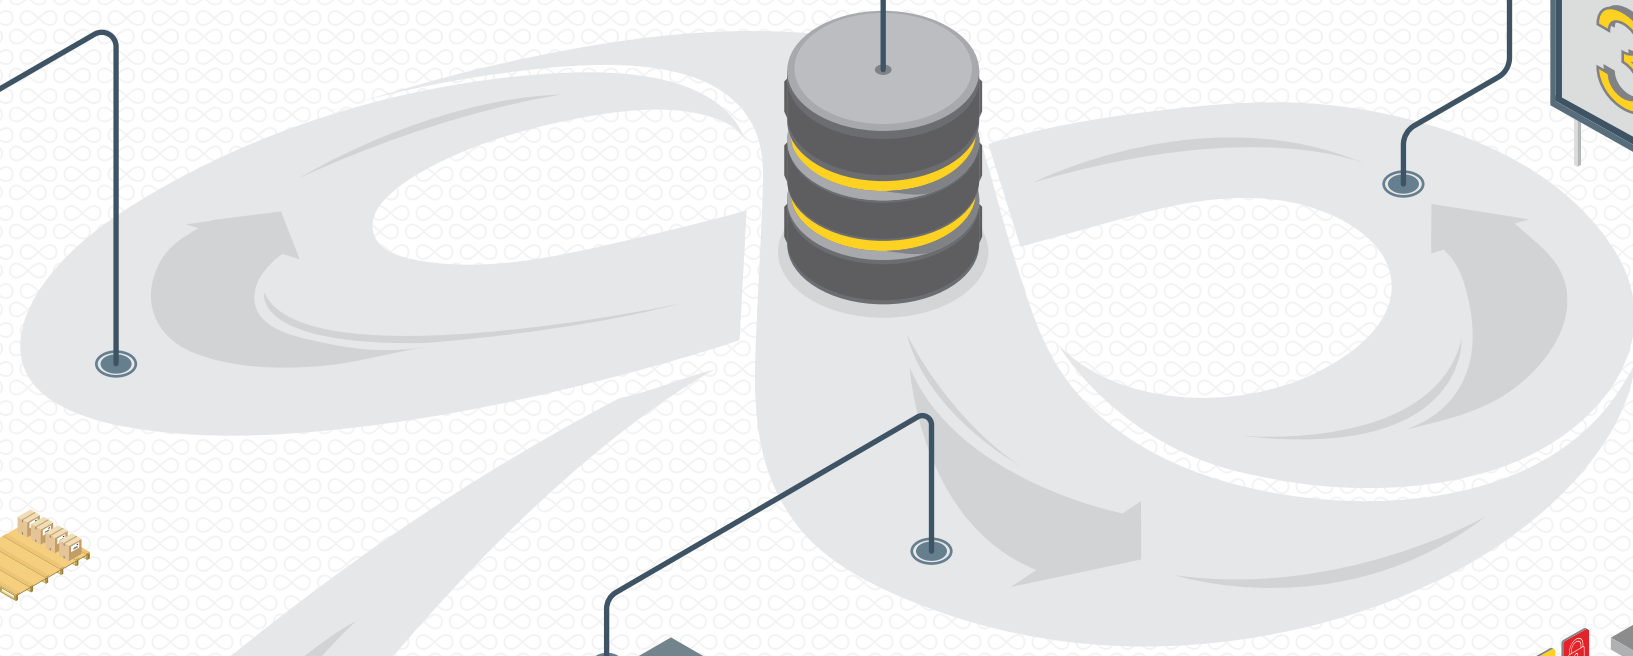

Re-imagine how quality data can be used.

1 Enterprise Visibility

Get end-to-end, real-time visibility into quality operations throughout your entire enterprise by aggregating data from your production lines, laboratories, supply chain, packaging, and finished products.

MULTI-SITE DATA COLLECTION

2 Operational Insight

Uncover previously unknown insights through summarization and analysis of your quality data.

Results: Quality Re-Imagined

Track the benefits of your changes, measure effectiveness, and generate returns on your quality investment. With this level of control, you can streamline and optimize quality — from suppliers to buyers — and continuously improve your operations.

- Gain Visibility to Your Entire Enterprise
- Reduce Waste and Scrap
- Minimize Cost
- Boost Customer Loyalty
- Limit Data-Entry Requirements
- Maximize Value
- Increase Audit Efficiency
- Improve Product Consistency
- Mitigate Risk
